

WHITEPAPER

NEKI

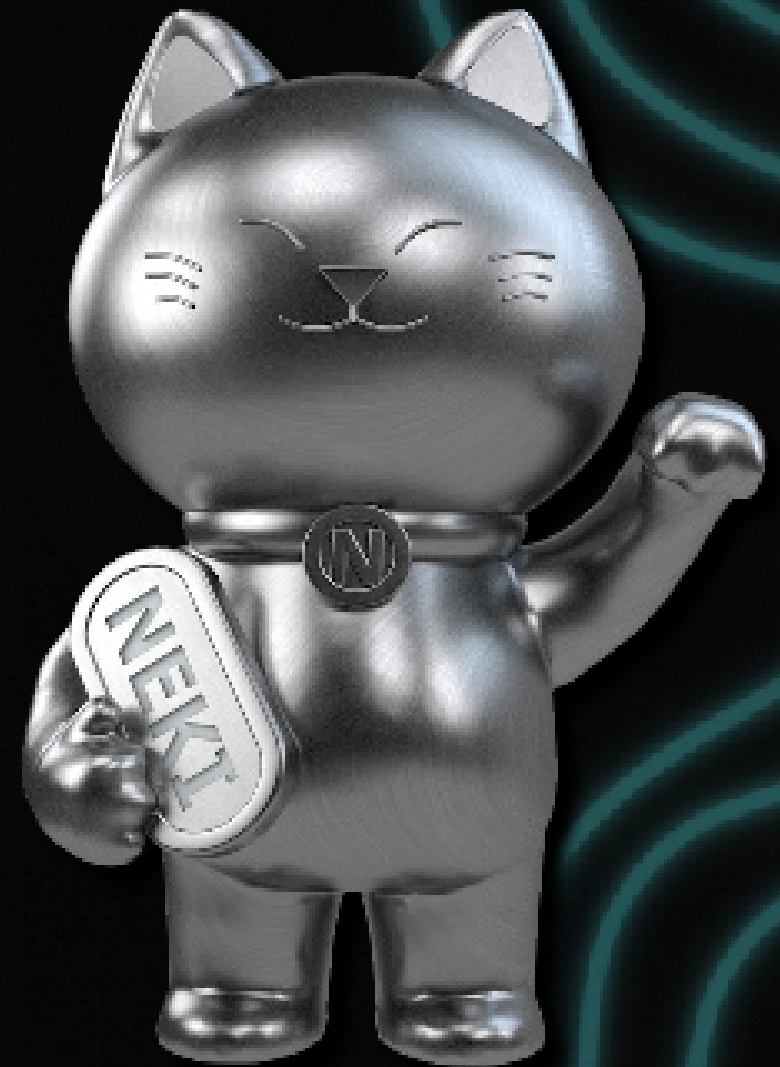

THE LUCKY TOKEN

INTRODUCTION

Inspired by the Maneki-Neko fortune cat, NEKI is a BSC token joining the cryptoverse to become the top community token.

Neki's mission is to build one of the biggest global crypto communities in the world for cat fans and crypto enthusiasts, creating a wholesome environment around the token; one of a kind NFT collection (500 NFTs), rare figurines, collectibles and the NEKI wallets with NFC technology that allow contactless payments. This combined with the token's ultra-limited supply (10M tokens only) makes the whole NEKI ecosystem quite unique and exclusive. The year of the cat (2023) is right around the corner and NEKI is meowing for success!

NEKI was built based on trust and low fees, the initial liquidity was locked for 5 years, with 0% buy and sell tax, along with minimal transaction costs, allows profits to be taken after only, relatively, small price gains. Net gains can be made with token price increases of <3%.
